

## **BRISTLING DEN (UNDERGROUND)**

### **PROFILE**

The mysterious and enigmatic cave filled with puzzles and a strange society of harmless monsters that hide from violent humans and the intimidating creatures of the wild. The seemingly small cave is of no use to the government, as only “weak” creatures inhabit the area.

### **SETUP**

The den is made of precious limestone and is illuminated by torches. Although the den itself appears small on the outside, the inside has a number of floors and layers where a newcomer can easily get lost. The differentiating size is to deceive predators from the outside that there is no prey on the inside because it is so small.

Bristling Den is home to plenty of rare talismans and artifacts that refer to ancient times within the planet. The inhabitants keep these treasures well-hidden and obtaining them requires a plethora of skill and intelligence.

There is a continuous green ocean that flows throughout the den. All of the water that appears in the den is poisonous towards humans, but safe to drink for every other creature. Despite its poisonous characteristics, one can ride canoes to move across the area safely.

### **POPULATION**

The creatures that exist in the cave range from insects to creatures that are 2 feet tall. Their lack of stature allows them to be able to pass through the entrance without problem. They are a more peaceful society than most other areas in the Calian Territory.

Duke, a wise wolf that stands at 6 feet tall, is the leader of the cave and the protector of the creatures. He is a very wise creature that is more concerned with the safety of the den rather than the planet.

### **AMBIANCE**

The atmosphere of the cave is incredibly – the sound ranges from complete silence to the sounds of ocean tides gently brushing on the wooden planks the character walks on. Footsteps easily echo throughout the cave and grab the creature’s attention right away.
